

Dr. Owor has over 25 years professional and research experience using tools such as site measurements, remote sensing geophysics to develop groundwater and to evaluate and map out environmental influences and impacts on water resources in Uganda and the region. The career goal is to contribute to the availability of safe-water and hygiene for food security, health, socio-economics, etc. under conditions of climate change/variability. He is currently an Associate Professor in the Department of Geology and Petroleum Studies, and Dean of the School of Physical Sciences.
